

Predictive Analysis Report on
Government Project Risk, Growth, and Gain Assessment

Project Name	{{PROJECT_NAME}}
District / State	{{DISTRICT}} / {{STATE}}
Analysis Period	{{ANALYSIS_PERIOD_START}} to {{ANALYSIS_PERIOD_END}}
Report Generation Date	{{REPORT_DATE}}
Report ID	MoRD/PAR/{{FY}}/{{ST}}-{{LGD}}/{{SEQ}}
Data Source(s)	{{DATA_SOURCES}}
Prepared By	{{PREPARING_UNIT}}
Model Version	{{MODEL_VERSION}}

DISCLAIMER - PREDICTIVE NATURE OF ANALYSIS

This report presents model-based projections of project risk, growth and gain, derived from the data sources cited above. All figures are probabilistic estimates, not statements of fact, and are subject to data quality, modelling assumptions and future conditions. This report does not constitute a sanction, commitment or policy decision of the Ministry of Rural Development or the Government of India, and should not by itself be relied upon for land acquisition, compensation or budgetary decisions without independent verification.

Report Body

{{REPORT_BODY}} - executive summary, methodology, risk / growth / gain findings, assumptions and limitations follow here.

Annex T: Template Specification

For template maintainers. Omit this annex from generated reports (*include_spec=False*).

T1. State Emblem placement

The emblem slot (dashed box, page 1) is a placeholder only. Insert the official State Emblem of India artwork as supplied by the Government of India; do not redraw, recolour, crop or alter it. Use of the Emblem is regulated by the State Emblem of India (Prohibition of Improper Use) Act, 2005, and the template should be used only for documents issued under the Ministry's authority. Note that the Emblem (Lion Capital of Ashoka) is distinct from the Ashoka Chakra used on the national flag; the Chakra alone should not be used as a substitute.

Position: top-left, aligned to the left margin (42 pt), top edge 27 pt below the tricolour band. **Size:** about 19 x 25 mm (55 x 70 pt) including the *Satyameva Jayate* legend where the artwork includes it. **Clear space:** at least one quarter of the emblem width on all sides. **Colour:** as per the supplied artwork (single colour on monochrome prints). Confirm dimensions against the current official guidelines before issue.

T2. Colour and typography

Saffron #FF9933	Green #138808	Navy #0B2A6B	Ink #1F2937
-----------------	---------------	--------------	-------------

Saffron and green are used only for the tricolour band, rules and accent bars; never for body text (insufficient contrast on white). Navy carries headings. Typeface: Helvetica family (sans-serif), body 9.5/13.5 pt, headings bold. Swap in an institution-approved sans-serif (for example Noto Sans) by registering the font in ReportLab; if Devanagari text is added, use a Devanagari-capable font.

T3. Report ID and classification

Format: MoRD/PAR/{{FY}}/{{ST}}-{{LGD}}/{{SEQ}}, for example **MoRD/PAR/2026-27/TN-603/00001**. FY = financial year (YYYY-YY); ST = two-letter state/UT code; LGD = district code from the Local Government Directory; SEQ = five-digit running number, unique per FY and district. Pass FY, ST, LGD and SEQ separately and the ID is assembled automatically, or pass REPORT_ID directly.

Classification is a required field. Use the level assigned under the applicable security instructions (for example Unclassified, Restricted, Confidential). The value appears in the page-1 badge and every footer. Do not default it silently: an unset value prints as a highlighted placeholder so it cannot be missed.

T4. Placeholder register

Placeholder	Description	Format / example	Req.
PROJECT_NAME	Project name as on the land acquisition portal	Text, up to 120 characters	Yes
DISTRICT, STATE	Jurisdiction of the project	Names as per LGD	Yes
ANALYSIS_PERIOD_START / END	Period the analysis covers	DD Mon YYYY, e.g. 01 Apr 2026	Yes
REPORT_DATE	Generation date (auto-fill at run time)	DD Mon YYYY	Yes
FY, ST, LGD, SEQ / REPORT_ID	Components of the unique report ID	See T3	Yes
CLASSIFICATION	Document security classification	Text, upper-cased on output	Yes
DATA_SOURCES	Data source citations (dataset, owner, as-of date)	Semicolon-separated list	Yes
PREPARING_UNIT	Division/unit issuing the report	Text	Yes
MODEL_VERSION	Version of the predictive model used	e.g. v1.0	Yes
REPORT_BODY	Report content (flowables in the script)	Replaces page-1 stub	Yes
